even more These are the same investors whose *Wealthy Barber's* Buy and Hold approach drove the stock markets up, up and away in the 1990s. Their long range financial plans called for compounding returns of 7% or 8% so they could retire rich, ...

Speculative Trading and Bubbles: Evidence from the Art Market

We find that a one standard deviation increase in volume lowers future returns by 67%. Further, about 47% of art excess returns forecasts are negative, which lines up well with the idea of a bubble. In addition to these known properties of disagreement-based models, our model yields additional predictions for holding periods.

Steer Clear of these 8 Common Investment Pitfalls

In 1989, Canadians were introduced to David Chilton's *The Wealthy Barber*, which suggests investing a percentage of what you earn in long-term growth. Be it 10%, 15%, or 20% (perhaps even 30% if you have neglected your savings), you should set aside an annual percentage of your earnings for your retirement.
